

About DVASE Young Members Group (DVASE YMG)

A Young Members Group (YMG) compliments its member organization (DVASE) and provides a blended community for young structural engineers with less than 10 years of licensed experience.

DVASE YMG intends to serve our fellow young DVASE members and other young structural engineers by assisting them as they build their careers in the field of Structural Engineering. DVASE YMG's initial focus will be to offer technical training, networking and community outreach opportunities to its members.

The YMG is will hold social events, technical seminars, community outreach events, and construction site tours that are independent of the seminars and events offered by DVASE.

Goals

- Connect young engineers and facilitate the exchange of technical information and 'lessons learned' among the members.
- Facilitate the development of leadership and management skills of young engineers through mentorship programs.
- Encourage and facilitate the involvement of young engineers in community and social outreach programs.
